Summary

I am a second-year B.Tech student with a passion for learning. During an internship in web development, I worked on various tasks and created various projects. This experience allowed me to learn new techniques and broaden my understanding of web development. Being a CP Enthusiast, I am still learning DSA and while learning the same I have achieved 5# stars on platform like HACKER RANK in both the Programming Languages C and C++ and 3# stars on CODECHEF Platform. Moreover, I enjoy front-end development using HTML, CSS, JS, and Bootstrap and am excited to explore more advanced frameworks like Angular and React. I am looking forward to learning more about back-end technologies soon, as I believe it is important to have a comprehensive understanding of the full-stack. I also have basic knowledge about Git & GitHub Platform. Recently, I started learning Android development using Flutter and was fascinated by the opportunities it presents. Apart from technology, I have an interest in stock marketing and am keen to expand my knowledge in emerging areas such as cloud computing. My curiosity and eagerness to learn and grow in the field of technology drive me, and I am excited about the opportunities that lie ahead.
